

Benefits

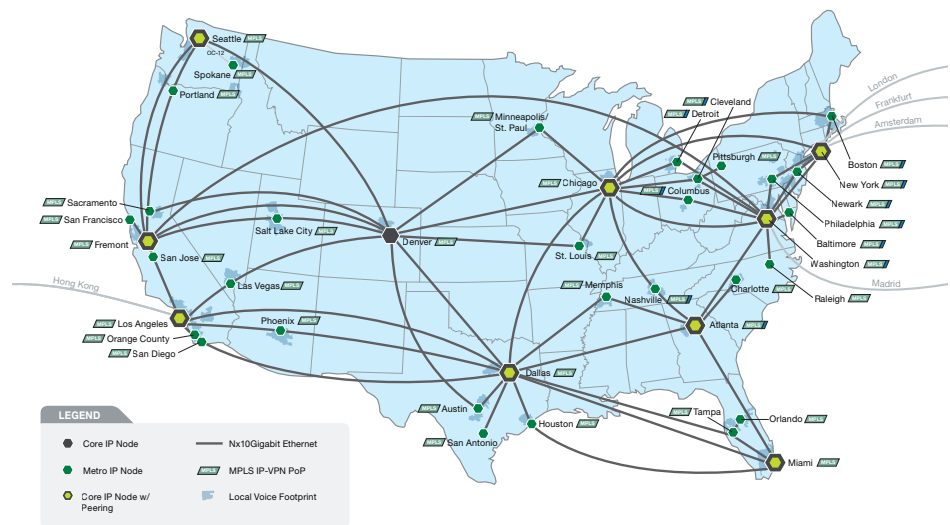

- High-speed Internet service through the XO Tier 1 nationwide IP network
- Flexible access through fiber, Ethernet and carrier-grade broadband wireless capabilities, and scalable bandwidth options from 1.5 Mbps to 40 Gbps
- Redundant, reliable IP network infrastructure to ensure availability and Quality of Service
- Monitor bandwidth capacity with web-based monitoring and reporting tools
- Complete solution including circuit and equipment ordering, installation, 24 x 7 customer support and proactive network monitoring, and single invoice billing

Dedicated Internet Access

Reliable, high-speed Internet connectivity with guaranteed bandwidth

Today's businesses depend more and more on reliable access to real-time information and web-based Internet applications. With Dedicated Internet Access service, you benefit from business-grade access to the Internet over the XO Communications Tier 1 nationwide IP network at the fastest speeds possible. Take advantage of high-speed, guaranteed bandwidth to meet your heavy demands for Internet access or e-commerce applications. Dedicated Internet Access also provides you with simple, manageable and scalable high-capacity bandwidth choices, multiple access options, robust Service Level Agreements, and web-based monitoring and reporting tools.

IP Network

A Fast, Reliable Connection to the Internet

Count on XO Communications to give you fast, reliable, high-capacity Internet connectivity to support web-based applications that are essential to your revenue streams.

Designed specifically to meet your requirements and grow with your business, the XO Communications advanced network delivers the utmost in performance and robust Internet access.

XO Communications is among one of the very few facilities-based Tier 1 Internet

backbone providers in the United States—with hundreds of private peering arrangements. By routing around congested public peering points, these private peering relationships with virtually all major Internet providers give you reliable connectivity and the best possible speed and throughput for your Internet traffic.

What’s more, the nationwide IP network architecture is designed to maximize redundancy with no single IP point of failure. XO delivers your data to its destination securely, reliably, and quickly.

Exceptional Features

Dedicated Internet offers a comprehensive set of standard features included with your service:

- Multiple solutions that are custom-designed for different types and sizes of businesses, with an accompanying range of access types of speeds from 1.5 Mbps to 40 Gbps
- Router with preconfigured settings, installed by XO and including ongoing

- maintenance and support
- IP address allocations at no cost
- Primary and secondary Domain Name Service (DNS) registration and hosting
- Web and email hosting services
- Competitive Service Level Agreements (SLAs)
- Customer support and proactive network monitoring 24/7
- Web based monitoring and reporting tools

DIA Capacity Port Speeds

Choose from a variety of that range from basic Internet service to transfers of very high-end applications such as video conferencing, VoIP or web hosting services.

Optional Features

Select from expanded Customer Premise Equipment (CPE) and no cost router options, including:

- Border Gateway Protocol (BGP4) routing protocol—for managing multiple, high-speed DIA connections to the Internet
- Network Access Translation (NAT)—to allow conservation of scarce IP addresses

About XO Communications

XO Communications is a leading nationwide provider of advanced communications services and solutions for businesses, enterprises, government, carriers and service providers.

XO customers include more than half of the Fortune 500, in addition to leading cable companies, carriers, content providers and mobile network operators. Utilizing its unique combination of high-capacity nationwide and metro networks and fixed wireless capabilities, XO offers customers a broad range of managed voice, data and IP services with proven performance, scalability and value in more than 85 metropolitan markets across the United States.
