

XO[®] HIGH SPEED DEDICATED INTERNET ACCESS SERVICES

Using Ethernet over Copper Technology

XO DEDICATED INTERNET ACCESS SERVICES

Get reliable and affordable High Speed Dedicated Internet Access to meet your data demands now and into the future. Using Ethernet over Copper technology, XO Communications[®] provides businesses in copper-fed locations* with easy-to-use, standards-based, Ethernet Internet Protocol. This service is ideal when your company requires simple, manageable and scalable high bandwidth solutions.

With XO High Speed Dedicated Internet Access using Ethernet over Copper, you can:

- Implement an affordable solution that offers 10Mbps of speed to support your business as it grows
- Get high quality, reliable data transfers over the XO nationwide, facilities-based, state-of-the-art OC-192 Internet Protocol (IP) backbone network, which is backed by industry level Service Level Agreements
- Eliminate the need to invest in new equipment for high bandwidth capabilities
- Make the most of your resources by monitoring your bandwidth capacity with Web-based monitoring and reporting tools
- Maximize company performance with reliable communications using high-speed access to the Internet, your company Intranet, and Extranet resources
- Increase productivity with a connection that can quickly transfer large data and multimedia files between networks
- Gain complete solutions that include circuit and equipment ordering, installation, 24x7 customer support and proactive network monitoring, and single invoice billing.

High Speed Dedicated Internet Access from XO Communications:

- Provides dedicated, clear-channel, point-to-point connections and industry-leading public and private peering arrangements
- Offers expanded Customer Premise Equipment options

- Features optional Border Gateway Protocol (BGP4) for dynamic routing of information between different administrative routing entities
- Eliminates requirement to collocate on Customer Premise Equipment.

A Fast, Reliable Connection to the Internet

When the Internet is fundamental to your business, you need more than high-speed Internet access. You need a reliable partner who can provide what you need today and tomorrow. XO understands your business-critical needs for top-performance, always-on, end-to-end network management.

Designed specifically to meet your requirements and grow with your business, the XO advanced private network delivers the utmost in performance and robust Internet access.

As one of only a few fully peered facilities-based, Tier 1 Internet backbone providers in the United States, XO has hundreds of private peering arrangements in most major metropolitan areas.

By routing around congested peering points, these private peering relationships with virtually all major Internet providers give you reliable connectivity and the best possible speed and throughput. That's how XO delivers your data to its destination securely, reliably, and along the fastest route possible.
