

# XO™ CARRIER LONG DISTANCE TERMINATION SERVICES

*A Single Meet Point to Terminate Traffic to all 50 States*

XO VOICE SERVICES

One interconnection. One contract. One set of low competitive rates. Six-second billing (after a six second minimum). Transport over the high-speed, national XO fiber network. Electronic call detail and access to utilization reports. Usage contributes to your total volume discount.

Providing reliable and cost-effective termination of long distance calls is vital for your business success. With XO™ Carrier Long Distance Termination, you can complete interstate calls in all 50 states and intrastate calls in the continental 48 states (excludes AK and HI) with only one interconnection. There is no need to negotiate with multiple local vendors or manage a variety of complex interconnection sites and contracts.

And, with our electronic call detail, six-second billing, comprehensive volume discounts, and 24-hour customer support, XO™ Carrier Long Distance Termination makes it simple for you to provide the services your customers demand.

## With Carrier Long Distance Termination, you can:

- Terminate traffic to all 50 states with only one interconnection
- Avoid negotiation and interconnection with multiple local / regional vendors
- Realize competitive rates and high quality transmission via the XO™ high-speed national fiber network and
- Receive call detail electronically via CD.

## Carrier Long Distance Termination:

- Connects your switch to the XO DMS 500 via a DS1 or DS3
- Transports your end-users' Inter- and Intrastate traffic over the high quality, high-speed XO OC-192 long haul fiber network
- Terminates traffic via Feature Group D (4-wire trunk connections)
- Bills all calls in six-second increments (after a six-second minimum)
- Provides easy-to-use electronic call detail
- Offers a complete solution for all your long distance termination needs, including 24x7 customer support, single invoice billing, electronic call detail and contribution towards your volume discounts.
