Extend Your Network Reach & Revenue Potential

Ethernet Services — delivered via copper (EoC), serial (EoS), fiber, or fixed wireless — are ideal for carriers and service providers looking to migrate their DS1 and DS3 end-users to the high quality and performance of next-generation Ethernet services. With more metro coverage than any service provider today, Ethernet Services allow you to meet your customers' demands for Ethernet connectivity without investing in expensive fiber networks.

Ethernet Services provide customers with dedicated, symmetrical bandwidth, and competitive service level agreements mirroring traditional time division multiplexing (TDM) services.

More Bandwidth Options

Take advantage of a wide variety of access options, ranging from 3Mbps – 10Gbps.

Access Additional Network Potential

Access to our high-speed Internet and MPLS networks, or traditional transport services.

Automation & Management

Utilize our user-friendly applications for automated pricing and order processing.

Expand Your Sales Footprint

XO Ethernet Services reach nearly 4 million buildings and 10 million businesses nationwide.

Generate New Revenue Streams

Discover revenue opportunities when transitioning legacy TDM customers to Ethernet Services.

Reduce Expenditures

Access our nationwide network and avoid the expense of your own network build.

Off-Fiber Access	Bandwidth	LSO Distance	Facilities Used
Ethernet over Copper	3Mbps	≤ 8,000 ft	2 copper pair
Ethernet over Copper	5Mbps	≤ 8,000 ft	3 copper pair
Ethernet over Copper	10Mbps	≤ 9,000 ft	5 copper pair
Ethernet over Copper	10Mbps	9,001–11,000 ft	8 copper pair
Ethernet over Copper	15Mbps	≤ 9,000 ft	8 copper pair
Ethernet over Copper	20Mbps	≤ 7,000 ft	8 copper pair
Ethernet over DS1	3Mbps	Any Distance	2 DS1s
Ethernet over DS1	4.5Mbps	Any Distance	3 DS1s
Ethernet over DS1	6Mbps	Any Distance	4 DS1s
Ethernet over DS1	10Mbps	Any Distance	7 bonded DS1s
Ethernet over DS3	44Mbps	Any Distance	1 DS3
Ethernet over DS3	88Mbps	Any Distance	2 bonded DS3s

Off-Fiber Availability

While XO provides access to an expansive fiber network, it's our unique, off-fiber service offerings that provide customers with unparalleled access to the XO nationwide network.
