

XO[®] VOICE OVER INTERNET PROTOCOL TERMINATION (VOIP TERMINATION)

Reliable long distance access for Carriers via the XO IP Network XO CARRIER SERVICES

XO[®] VOIP Termination enables enhanced service providers to offer long distance VOIP access to residential and commercial customers.

Offering reliable and cost-effective termination of long distance calls is vital for your business success. With XO VOIP Termination, you can complete nationwide interstate and intrastate calls with only one interconnection. There is no need to negotiate with multiple vendors or manage a variety of complex interconnection sites and contracts.

XO VOIP Termination makes it simple for you to provide the services your customers demand.

XO VOIP Termination provides:

- Connectivity from an IP network to PSTN for terminating domestic long distance calls
- Nationwide termination (outbound) service
- Multiple interconnection options: Time Division Multiplex (TDM) or Session Initiation Protocol (SIP) via G711 or G729a
- Reliable intercity transport via the vast XO IP backbone and Sonus infrastructure
- NPA NXX billing structure which enables aggressive pricing over LATA/OCN models
- 24x7 customer and technical support

Benefits:

- Connects your switch to the robust XO Sonus softswitch infrastructure
- Transports your end-users' interstate & intrastate traffic over the high speed XO Tier 1, 3.2Tbps, MPLS-enabled IP backbone
- Opportunity to utilize the same facility for inbound calls when purchased in combination with XO VOIP Origination service
- Bills all calls in six-second increments, with an initial six-second minimum
- 24x7 customer support, daily electronic call detail, and an aggressive pricing structure

Applications that qualify for XO VOIP Termination service:

- VoIP Telephony Applications
- Broadband end-user access
- IP Fax Services

Connect to the VOIP Termination network via the following access methods:

- Private Ethernet Access into XO Session Border Controllers (FastE / GigE)
- Dedicated Internet Access into the XO IP Network
- Public Internet or "bring your own" access
- TDM interconnections can be supported as well (PRI or SS7 signaling)

XO VOIP Termination Contract terms:

Customer represents and warrants that all traffic is IP originated in accordance with all applicable federal & state laws and regulations. Please see the XO VOIP Termination Exhibit for full contract terms.
