TARIFF FORMAT

- A. Sheet Numbering** – page numbers appear in the upper right corner of the page. Pages are numbered sequentially. When a new page is added between pages already in affect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Sheet Revision Numbers** – Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Alabama Public Service Commission. For example, the 4th revised page 14 cancels the 3rd revised page 14. Consult the Check Page for the page currently in effect.
- C. Check Sheets** – When a tariff filing is made with the Alabama Public Service Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.)

3. Rules and Regulations (Cont'd)**3.19 Terminal Equipment (Cont'd)**

3.19.3 When services using local exchange carrier voice grade facilities are terminated in Customer-provided terminal equipment, channel derivation devices, or communications systems, the Customer shall comply with the minimum protective criteria set forth below.

3.19.3.1 When the facilities furnished under this tariff are used in common with local exchange carrier services, it is necessary, in order to prevent excessive noise and crosstalk, that the power of the signal applied to local exchange lines be limited. A single valued limit for all applications cannot be specified. Therefore, the power of the signal in the band above 300 Hertz which may be applied by the Customer-provided equipment at the point of termination will be specified by the Company for each application.

3.19.3.2 To protect the telecommunications services from interference at frequencies which are above the band of service provided, the Company will specify the acceptable signal power in the following bands to be applied by the Customer-provided equipment or communications systems at the point of termination to ensure that the input to local exchange carrier facilities does not exceed the limits indicated:

- (a) The power in the band from 3995 Hertz to 4005 Hertz shall be at least 18 dB below the power of the signal as specified in Section 3.19.4
- (b) The power in the band from 4000 Hertz to 10,000 Hertz shall not exceed 16 dB below one milliwatt.
- (c) The power in the band from 10,000 Hertz to 25,000 Hertz shall not exceed 24 dB below one milliwatt.
- (d) The power in the band from 25,000 Hertz to 40,000 Hertz shall not exceed 36 dB below one milliwatt.

If signal is in the 2450 to 2750 Hertz, it must not exceed the power present at the same time in the 800 to 2450 Hertz Band.

3.19.5 Where such Customer-provided equipment or communications systems applies signals having components in the spectrum 300 Hertz, excluding ringing signals, the currents and voltages (including all harmonics and spurious) at the interface shall not exceed the limits indicated in Sections 3.19.5.1 through 3.19.5.4 following:

3.19.5.1 The maximum root-means-square ("rms") value, including DC and AC components, of the current per conductor will not exceed .035 ampere.

3.19.5.2 The magnitude of the peak of the conductor or ground voltage shall not exceed 70 volts.

3.19.5.3 The conductor voltage shall be such that the conductor ground voltage limit in .10 preceding is not exceeded. If the signal source is not grounded, the voltage limit in .0342 preceding applies to the conductor to conductor voltage.

3.21 Allowance for Interruptions

3.21.1 Except as provided for in Section 3.5 above, which pertain to Directory Assistance, the following credit allowances for interruptions of Company services will be made:

- (a) Except as provided for elsewhere in this tariff, credit allowances will be made for interruptions associated with those Company services for which charges are specified on the basis of per minute of use, or on usage of a fraction of a minute, and in which there may be interruption of an individual call, due to a condition in the Company's shared interexchange facilities or in shared access or termination facilities provided by other carriers, where the interruption can be remedied by redialing the calls. A credit allowance will be made for that portion of a call which is interrupted due to poor transmission (e.g. noisy circuit) quality, one-way transmission (one party is unable to hear the other) or involuntary disconnection caused by deficiencies in the Company's service. A Customer may also be granted credit for reaching a wrong number. To receive a credit, the Customer must notify a Company Customer Service Representative and furnish information, including the called number, the service subscribed to, the difficulty experienced, and the approximate time the call was placed. Credit allowances will not be made for a) interruptions not reported to the Company within twenty-four (24) hours, or b) interruptions that are due to the failure of power, equipment, systems, or services not provided by the Company. If the Customer elects to use another means of communications after one of the above interruptions, or during a period when he or she is unable to place a call over the Company, the Customer must pay the charges for the alternative service used.

3.27 Schools and Libraries Discount Program

3.27.1 General

The Schools and Libraries Discount Program permits eligible schools (public and private, grades Kindergarten through 12) and libraries to purchase the Company services offered in this tariff at a discounted rate, in accordance with the Rules adopted by the Federal Communications Commission (FCC) in its Universal Service Order 97-157, issued May 8, 1997. The Rules are codified at 37 Code of Federal Regulation (C.F.R.) 54.500 et. seq.

As indicated in the Rules, the discounts will be between 20 and 90 percent of the pre-discount price, which is the price of services to schools and libraries prior to application of a discount. The level of discount will be based on an eligible school or library's level of economic disadvantage and by its location in either an urban or rural area. A school's level of economic disadvantage will be determined by the percentage of its students eligible for participation in the national school lunch program, and a library's level of economic disadvantage will be calculated on the basis of school lunch eligibility in the public school district in which the library is located. A non-public school may use either eligibility for the national school lunch program or other federally approved alternative measures to determine its level of economic disadvantage. To be eligible for the discount, schools and libraries will be required to comply with the terms and conditions set forth in the Rules. Discounts are available only to the extent that they are funded by the federal Universal Service Fund (USF). Schools and libraries may aggregate demand with other eligible entities to create a consortium.

The Company Calling Card Service is provided to Customers for use when away from their established service locations. The Company will issue Company Calling Cards that will allow Customers to place telephone calls and to re-originate calls, a feature which allows a Customer to place a new call without hanging-up and re-dialing the toll free access number. Access to XO's Calling Card is gained by dialing a Company-designated toll free access number (e.g. 800-NXX-XXXX) and then entering a 10 digit account number plus a four digit personal identification number (PIN) and the called telephone number.
