Preliminary Statement

This tariff contains the regulations and rates applicable to the furnishing of intrastate resale and facilities-based common carrier communications service by XO Communications Services, Inc. (formerly XO California, Inc.) between locations within the State of California.

EXPLANATION OF SYMBOLS

- (C) - To signify changed listing, rule, or condition which may affect rates or charges.
- (D) - To signify discontinued material, including listing, rate, rule or condition.
- (I) - To signify increase.
- (L) - To signify material relocated from or to another part of the tariff schedules with no change in text, rate, rule or condition.
- (M) - To signify the relocation of material from one page to another within the same tariff.
- (N) - To signify new material including listing, rate, rule or condition.
- (R) - To signify reduction
- (T) - To signify a change in wording of text but not change in rate, rule or condition.
- (Z) - To signify a correction to material previously filed.

1.0 RATE SCHEDULES

Schedule 1: Network Access Service

I. InterLATA Network Access

A) Description of Service:

Company InterLATA Network Access is an InterLATA service that provides a dedicated transmission path between a customer designated premises and a Company Point of Presence ("POP"). Where InterLATA Network Access is available, service is offered as a high capacity dedicated transmission facility available 24 hours per day, 7 days per week in the following bandwidths: DS1 (1.544 Mbps) and DS3 (44.436 Mbps).

The facilities to the customer-designated premises may be entirely On-Net or Off-Net. Customers may commit to one, two or three year service terms. The minimum service period for InterLATA Network Access is one year. Should the Customer terminate service prior to the end of the term commitment, the Customer will be billed a termination charge equal to the monthly recurring charge times the number of months remaining in the term.

B) Rates and Charges:

Rates and charges for InterLATA Network Access service are defined herein and are based on the locations of the Customer-designated premises in relation to Company's network. Specifically, Customers will be charged according to whether the Customer-designated premises are On-Net or Off-Net. As used herein, On-Net service shall mean service to the Customer-designated premises is provided entirely over Company facilities. Off-Net service shall mean service to the Customer-designated premises is not provided entirely over Company facilities. Instead, service to the Customer-designated premises is provided by Company, in whole or in part, through the use, purchase or lease of facilities from a service provider other than Company.

1) Rate Elements:

Two rate elements apply to Off-Net InterLATA Network Access: Channel Termination and Network Access Mileage. One rate element applies to On-Net InterLATA Network Access: Channel Termination.

a) Channel Termination: The Channel Termination rate element provides for the dedicated transmission path between the Customer-designated premises and the Company POP. One Channel Termination charge applies per point of termination. If the Customer-designated premises and the serving wire center are collocated in the same building, a Channel Termination charge will apply.

b) Network Access Mileage: The Network Access Mileage rate element provides for the dedicated transmission facilities path between the Customer's serving wire centers associated with the Customer-designated premises and the Company POP. The Mileage rate element is made up of two charges: a flat rate per circuit ("Fixed") and a flat per-mile rate ("Variable").

The Mileage rate element will be rounded up to the next mile for any fraction of a mile. For example, 0.001 miles will be charged at 1 mile. If both the Customer's designated premises and the Company POP are within the same central office, Mileage charges will not apply.

Schedule 1: Network Access Service (cont'd)

II. IntraLATA Network Access

A) Description of Service:

Company IntraLATA Network Access is an IntraLATA service that provides a dedicated transmission path between a Customer-designated premises and a Company Point of Presence (POP). Where IntraLATA Network Access is available, service is offered as a high capacity dedicated transmission facility available 24 hours per day, 7 days per week in the following bandwidths: DS1 (1.544 Mbps) and DS3 (44.436 Mbps). IntraLATA Network Access is used to provide access services in conjunction with IntraLATA Private Line, Dedicated Internet Access and Dedicated Long Distance.

The facilities to the customer-designated premises may be entirely On-Net or Off-Net. Customers may commit to one, two or three year service terms. The minimum service period for IntraLATA Network Access is one year. Should the Customer terminate service prior to the end of the term commitment, the Customer will be billed a termination charge equal to the monthly recurring charge times the number of months remaining in the term.

B) Rates and Charges:

Rates and charges for IntraLATA Network Access service are defined herein and are based on the location(s) of the Customer-designated premise(s) in relation to Company's network. Specifically, Customers will be charged according to whether the Customer-designated premises are On-Net or Off-Net. As used herein, On-Net service shall mean service to the Customer-designated premises is provided entirely over Company facilities. Off-Net service shall mean service to the Customer-designated premises is not provided entirely over Company facilities. Instead, service to the Customer-designated premises is provided by Company, in whole or in part, through the use, purchase or lease of the facilities from a service provider other than Company.

1) Rate Elements:

Two rate elements apply to Off-Net IntraLATA Network Access: Channel Termination and Network Access Mileage. One rate element applies to On-Net IntraLATA Network Access: Channel Termination.

a) Channel Termination: The Channel Termination rate element provides for the dedicated transmission path between a Customer-designated premise and Company's Point of Presence. One Channel Termination charge applies per each Customer point of termination. If the Customer-designated premises and the serving wire center are collocated in the same building, a Channel Termination charge will apply.

b) Network Access Mileage: The Network Access Mileage rate element provides for the dedicated transmission facilities path between the Customer's serving wire centers associated with the Customer-designated premise and the Company's Point of Presence. The Network Access Mileage rate element is made up of two monthly recurring charges: a flat rate per circuit ("Fixed") and a flat per-mile rate ("Variable").
