

There's a whole new
world in here

Welcome to the Ethereverse™

Unleash its power.

Imagine what you could achieve with faster connections, fewer delays, nimble application response, better Internet performance and a more reliable network.

With direct connections from your communications port to the XO Communications private network, your business will gain all the benefits of Ethernet and you'll enjoy a great end-to-end customer experience.

Put our network and services to work for you.

Bandwidth on Demand Capabilities

Whenever you need it

Deliver new applications faster

More flexibility, without sacrificing quality

Dramatically increase networking capacity

Easy-to-use, affordable Ethernet at enterprise-grade speeds

Reduce your dependence on multiple providers

Eliminate the local telephone company's last-mile connection

Streamline and simplify how you manage communications and networking

One point of contact for communications needs and inquiries

Get rid of packet congestion and delays

Remove a “hop” in the network flow

Enjoy an extraordinary experience using technology

For your employees, customers, and partners

Visit xo.com/etherverser to connect today.

Your End-to-End Connection

By taking advantage of the direct connection to your building, you're joining one of the largest, fastest, dedicated B2B providers in the country. We're one of the few providers with local, metro and nationwide coverage that provides a more reliable, cost-effective alternative to local exchange carriers.

The Elements of the Etherverse

Hosted PBX

Integrate high-def voice, advanced calling features and scalable, web-based management across multiple locations without expensive systems or equipment.

MPLS IP-VPN

Easily join locations on a private network with multiple classes of services for improved performance and lower cost.

IP Flex and IP Flex with VPN

Combine local and long distance voice, Internet and data on your own private network for improved security and performance at lower costs.

XO WorkTime

Increase the productivity of your mobile workforce, and reduce calling costs, by integrating XO mobility and unified communications applications with your XO Voice over IP service.

Ethernet Point-to-Point Connectivity

Securely and rapidly transmit time-sensitive, important information without delays using Ethernet point-to-point solutions.

Bandwidth on Demand

Get the bandwidth you need when you need it, without pre-scheduling.

Enterprise SIP

Use your own phone systems and MPLS network for Voice over IP across your locations to streamline management and reduce costs.

DIA

Reliably connect to the Internet at ultra-fast speeds and enjoy dedicated bandwidth with a network service level agreement.

Contact Center on Demand

Use the next-gen, cloud-based contact center to deliver a more consistent, interactive customer experience while reducing costs.
