

Settings for Email Program

To update settings for Email program:

If you are experiencing trouble sending or receiving Email, please make the following changes to your Email program. We are seeing this resolve many customer issues.

Generic Settings:

Use the following settings to configure your Email on a third party email client or on your mobile device.

Email Address:

user@yourdomain

Password:

Use the same password you used to login to your XO Web Hosting webmail.

Type Hostname Port

POP3 mail.yourdomain 110

SMTP mail.yourdomain 1025 (alternatively, port 25 and 587)

Also, please ensure that the Email program has SMTP authentication enabled.
